

GC10 Wireless Controller

Technical Specification Sheet

Description:

GC10 Controllers work with Levven Controls' wire-free switches to wirelessly turn lights and devices on and off. Use Levven Controls anywhere in your home or business, including detached garages, gatehouses, exterior lights, barns, and storage buildings. All without running a wire to the switch.

Installation:

Connect power and the load to the controller. Mount the controller in a junction box or switch box. Pair a Levven Controls switch to the controller to turn the load on and off.

Create a multi-way switch by pairing up to three different switches to one GC10 Controller. There is no limit to how many controllers a switch can be paired with.

For best wireless reception, release and extend the antenna wire out from the controller's plastic enclosure. For tight spaces, keep the antenna wire in its holder. See levven.com/support for further detail.

Specifications:
