

# Connecting Levven Q to your home network

## 1. LOCATION

Locate Levven Q in a central area of the home where an electrical plug and ethernet connection to your router are available.

## 2. POWER

Insert the power supply cable into Levven Q's DC power input and plug the power supply into a wall outlet.

## 3. NETWORK

Your other mobile devices connect to your home network via Wi-Fi. Levven Q will need to be on this same network.

Insert one end of the provided ethernet cable into the network port on the back of Levven Q. Connect the other end of the cable into a LAN port on your home router (or an ethernet jack connected to the router).

## Connecting Levven Q to your home network

### 4. CONNECTION

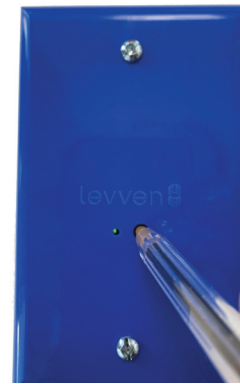

To confirm Levven Q has a connection to the internet, the yellow and green indicator lights on both sides of the ethernet outlet of Levven Q will illuminate.

### 5. WALL PLATE

Locate the blue Levven wall plate beside the electrical panel. (Homes with the electrical panel located outside of the home will find the plate located in the garage.)

### 6. PAIRING

Using the end of a pen, press and release the 'pairing' button through the center hole of the blue Levven wall plate. The LED light will begin flashing green through the smaller hole.

# Connecting Levven Q to your home network

## 7. PRESS BUTTON

Press and release the pairing button on the face of the Levven Q. Its LED will begin flashing green.

## 8. CONFIRM PAIRING

Using the end of a pen, press and release the 'pairing' button through the center of the blue Levven wall plate to confirm the pairing.

The LED will flash, confirming that Levven Q has been paired to the group of electrical load controllers in the home.

## 9. NEXT STEPS

Open the next instruction guide and follow the steps to download the Levven app and connect your mobile device to Levven Q.
